St. Mary's Kids get special holiday gifts courtesy of CareMed Specialty Pharmacy

Bayside, New York (December 23, 2014) —Holidays gifts and toys were in abundant supply at St. Mary's Hospital for Children yesterday when Mr. Moby Kazmi, CEO and Dr. Shan Ahmed of CareMed—a leading specialty pharmacy based in Lake Success, NY and his family visited. For the past three years Mr. Kazmi and his family have visited St. Mary's Kids during the holiday season to distribute a wide array of toys, games and special gifts to the excited young patients.

Each of St. Mary's Kids had an opportunity to request a holiday gift from the CareMed team, which the Kazmi and Ahmed family then personally delivered. To the delight of the children Mr. Kazmi and his family spent ample time interacting with them, making each child feel special.

“My family and I look forward to visiting these children every year” said Mr. Kamzi. “To see the smiles on their faces is what inspires us. The entire CareMed staff are strong advocates for children with special needs and medically complex conditions, and we will continue to do our best to support St. Mary's Kids.”

The annual CareMed visit to the Bayside hospital is a special holiday event St. Mary's Kids look forward to every year.

About St. Mary's Healthcare System for Children

St. Mary's Healthcare System for Children is a national leader in post-acute care for children with special needs and New York's largest provider of long-term care services to children with medically complex conditions and their families. Each day St. Mary's provides intensive rehabilitation, specialized care, and education to children throughout the New York metropolitan area at its inpatient facility – St. Mary's Hospital for Children – at home, and in the community. A pediatric healthcare innovator, St. Mary's opened the first medical facility for children in New York City in 1872, and today remains the City's only pediatric post-acute care hospital. St. Mary's created the nation's first pediatric palliative care program, NY State's first long-term home healthcare program for children, NYC's first certified pediatric traumatic brain injury program, and offers one of a select few interdisciplinary pediatric feeding disorder programs in the nation.
